Monitor your water remotely

Spending hours travelling to check your water? Save time and money with Ranchbot.

- 01 Prevent impending problems with your water supply
- 02 Real-time alerts sent to anyone in your team
- 03 Peace-of-mind knowing your livestock have water

"Ranchbot is a simple system, easy to install, very reliable, and affordable. It has enhanced our cattle operation with greater efficiency and security on our 50 square mile cow calf and stocker operation.

By using Ranchbot we have visibility 24/7 of over 60 troughs and 7 tanks in one of the most arid locations in California."

— J. W. Eade, Central California

Ranchbot is dedicated to managing water for livestock. It's what we do best.

Ranchbot provides you with the tools to monitor on-ranch water ecosystems delivering near real-time reporting on water trends and consumption. Receive alerts to your cell and email and access insights on MyRanchbot to monitor water across your ranch.

Key Benefits

- Works anywhere with Satellite or Cellular connectivity
- Detect leaks & faults with real-time SMS and email alerts
- Easy installation - install it yourself within 15 minutes
- Save time, fuel & labor costs
- On duty 24/7

Pricing

Water Level Monitor \$1,490 Satellite

Annual Subscription \$365

Do my livestock have enough water supply?

Are my livestock drinking water at all?

Is there a leak within my tank?
